Work Experience

Mid OutSystems Developer, October 2025 – Present
UBX PHILIPPINES CORPORATION – Pasig City, Metro Manila (Hybrid)

- Worked closely with clients to gather requirements and translate them into technical specifications or implementation.
- Analyzed existing applications to identify potential defects, performance bottlenecks, and areas of technical risk.
- Investigated, debugged, and resolved production and non-production issues to ensure application stability and reliability.
- Enhanced and extended existing application functionalities to meet evolving business and regulatory requirements.
- Collaborated closely with other developers to troubleshoot issues, provide technical guidance, and support defect resolution.
- Delivered technical solutions aligned with banking security, compliance, and quality standards.
- Participated in regular code reviews, ensuring high-quality standards were consistently met across all development efforts.

OutSystems Developer, November 2023 – October 2025
SM PRIME HOLDINGS INC. – Pasay City, Metro Manila (Onsite)

- Designed, developed, and maintained responsive web applications using the OutSystems platform.
- Translated business requirements into functional applications with a strong focus on performance and user experience.
- Integrated OutSystems applications with external systems using REST APIs, databases, and third-party services.
- Created reusable components and modules to streamline development.
- Participated in the full software development lifecycle including requirements gathering, technical design, coding, testing, deployment, and support.
- Ensured solutions adhered to best practices, security standards, and scalability requirements.

Backend Developer Intern, March 2023 – June 2023
PIXEL8 Web Solutions & Consultancy Inc. – Legazpi City, Albay (Remote)

- Built and maintained the server-side logic of the web application.
- Conducted regular code reviews and debugging to identify and address issues.
- Collaborated with the development team to implement new features and improve existing ones.

Education

Bachelor of Science: Information Technology, September 2023
Polytechnic University of the Philippines – Manila City, Philippines

- Cum Laude

Certifications

- OutSystems Associate Reactive Developer
- AWS Academy Graduate

Projects

SorbetesMo! - E-Commerce System with Supply Chain Forecasting for Ice Cream Products

- Led the development of an innovative online platform for the Ice Cream Industry, revolutionizing the buying and selling of products to meet industry needs.
- Integrated a forecasting algorithm, creating a predictive inventory system that reduced stockouts and minimized excess inventory, yielding substantial cost savings.
- **Technologies used: Java • Eclipse IDE • HTML5 • CSS3 • JavaScript • AJAX • MySQL**

Student Admission System

- Led the development of an academic project designed to automate and streamline the student admission process, reducing manual workload and data errors.
- Developed modules for student registration, application evaluation, and admission confirmation to ensure efficient data handling and record management.
- Implemented validation and verification features to ensure data integrity and prevent duplicate or incomplete applications.
- **Technologies used: Java • Eclipse IDE • HTML5 • CSS3 • JavaScript • AJAX • MySQL**

Attendance System

- Led an academic project to streamline workforce management, creating an efficient system for tracking employees' time-in and time-out.
- Integrated safety features to prevent duplicate time-ins, enhancing accuracy in the time and attendance system.
- Implemented an authentication for time-out, ensuring exclusive access and preventing unauthorized logouts in the time and attendance system.
- **Technologies used: Java Swing • Java • NetBeans IDE • MySQL**

Skills & Tools

Low Code Platform: OutSystems, Service Studio, AI Mentor Studio, Service Center

Programming: Java, C#, PHP, MySQL, HTML, CSS, JavaScript, Rest API

Database: MySQL, MSSQL

Tools: Git, GitHub, Insomnia, PhpUnit Test, Visual Studio Code, NetBeans IDE, Eclipse
